

The background of the page features a complex network diagram. It consists of numerous small circles, some of which are larger and more prominent than others, connected by thin, light-colored lines. These lines form a web-like structure that fills the upper and lower portions of the page. The overall color scheme is dark, with the network lines and text in white or light gray.

ELVIS PAPER v1

ELVIS PRESLEY COIN ECOSYSTEM

INTRODUCTION

Elvis Presley Coin was the answer to a simple question.

What would happen if a cryptocurrency project represented the greatest singer of all time?

When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us. The Elvis Presley Coin Ecosystem is our way of recognizing the importance of tearing down this long-established paradigm.

A community is held together by hundreds, if not thousands, of interconnected moments. We realized that true strength doesn't come from one of us alone, it comes from when we work together in harmony. With that thought bright in our minds, we began developing the Elvis Presley Coin Ecosystem in earnest.

BIRTH OF THE PROJECT

Elvis Presley Coin was released on June 21, 2022, fair launch , no team tokens.

I decided to create the project on the BSC network because the ETH network has unaffordable fees for a project that is against high taxes and fees.

We want to save your money!

I decided that the taxes should be as low as possible so as not to "steal" our holders, but that they should be enough to continue financing the project and creating more utilities because we are a 100% community project, without external financing.

Taxes are 3% to buy and 3% to sell.

2% goes to marketing and 1% to the LP.

The total supply is 1 billion, I decided this because the problem with many other projects is that they have a huge supply, causing them to lose usefulness and value in the future, because scarcity creates value. That is not going to happen to us.

THE VISION OF ELVISSWAP

We are dedicated to building the best Decentralized Ecosystem on the world, with staking, farming and very low fees.

The goal of ElvisSwap is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this Ecosystem so it may bring ever-increasing interested parties to the ElvisSwap platform.

Making a swap without a budget is a unique challenge, but by tackling various genres and product lines we will build a focused development team from the community.

We know that with our unified force, and the power of Elvis, we will be successful in advancing the Swap and Ecosystem as a whole, so that we reach new and spectacular heights together.

The best is yet to come!

NFTs Marketplace

Elvis Presley Coin is a project that wants to help artists, and NFTs are art, so we will make the most impressive NFTs of the greatest singer of all time, Elvis Presley.

MORE DEVELOPMENTS TO COME, CHECK OUT SOME OF THEM:

ElvisVerse

DAO organization

Elvis Presley Coin Fund

Video game

Dapps

Elvis Presley Blockchain

And much more. Each development will take longer than another, and everything will depend on the mcap we have, the holders, the market, etc. There are many variables, but our idea is that the whole world hears the name of Elvis Presley again.

CONCLUSION

The Elvis Presley Coin community start with the seed of an idea. What could happen with no centralized team, no funding, and no direct leadership? Could decentralization actually work? Could we follow the perfect storm of digital currencies, like BTC, DOGE or SHIB, except perpetuate something that is fully community-driven, instead?

This is the beginning of a new era for crypto. People are tired of so many dog coins with different names but with the same dynamics. People who did not have the privilege of being able to hear Elvis Presley while he was on stage, will now be able to know who Elvis was, how many fans he has, and how his name will come back to everyone's minds again.

Elvis Presley is the King of Rock and Roll and Elvis Presley Coin will be the King of Crypto!
